## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 04

TYPE OF FIRE: Wildland Fire

FIRE NAME: Valley

DATE ISSUED: 09-16-2015

TIME ISSUED: 2100

UNIT: LNU

### INPUTS

#### WEATHER SUMMARY

Partly cloudy in the morning becoming mostly sunny

Temps: 63° – 75° RH: 31 - 40% LAL -- 1

20ft – (MPH)

Slope/Valley – NW 6 to 8 Ridgetop -- NW 8 to 12 gusts to 16

#### Extended Outlook

Friday mostly sunny 74° - 79° RH 20 – 25%, Saturday mostly sunny 78° to 83° RH 20 -030%

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

Prior to yesterday's late morning rain, crews were responding to spot fires within islands near structures. Active burning was observed both interior and next to and just over established control lines.

The precipitation exceeded predicted totals but those totals were not consistent over the fires entirety. The precipitation impact to the various branches will vary.

Expect ERCs to take a short decline but with the expected Northwest winds and higher temperatures this dip will be short in duration. The predicted fire behavior is based on fuels having dried and the NW wind influence. The Probability of Ignition was reduced from 56% based on the assumption that the light flashy fuels will not have had ample time to dry within the current operational period.

##### Fire Behavior for Optimal Alignment Receptive Fuels

Fuel Type	ROS (Ft-MIN) Forward	ROS (Ft-MIN) Lateral	FL (Ft)	P(i)G
Grass / Low Brush	5 – 16	0 – 1	1 – 4	20%
Shrub / Pine	26 – 60	1 – 5	10 – 16	20%
Timber Understory	6 – 15	1 – 2	4 – 9	20%

Fuels that are in vertical alignment and jackpots, or during firing operations crews should expect significantly increased ROS and FL.

#### SPECIFIC:

Branch XV - I

With the north wind influence there is the potential to find sleepers in fuels and materials around structures.

Branch XIII Geysers

This area received higher the expected precipitation yesterday. Necessary action may be delayed by access compromised by the rain.

Branch XI – IX – VII – V

The precipitation will have a positive impact on the suppression efforts. Active fire or rekindle potential from the downed heavy fuels will have wind alignment and solar radiation.

Branch III

Minimal fire activity expected.

#### AIR OPERATIONS:

Air operations should not experience any lasting impacts

#### SAFETY

Wildfire environment with weakened trees, hidden areas of heat. Traction on fire roads may be reduced.

## Information Message

**Incident Public Information Line: (707) 967-4207**

**Incident Media Line: (916) 591-9018**

### **MEDIA**

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

### **CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)**

Social Media is increasingly being used by public agencies, the media and the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

### **PICTURES AND VIDEO OF INCIDENT**

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

### **LOST AND FOUND**

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

### **MAIL SERVICE**

The Information staff will assist you in mailing and receiving letters and packages.

**Archaeological and Historic Properties:  
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.  
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
